Professional Summary

Backend-oriented Full-Stack Developer with 4+ years delivering production web apps, AI-assisted workflows, and data-driven systems. I turn product requirements into database models, APIs, integrations, and UI flows, with stronger focus on backend architecture, performance, and release reliability. QA background helps me design maintainable flows, predictable validation, and releases with 0 critical bugs under my ownership.

Skills

Languages: TypeScript, JavaScript, Python, HTML

Backend & Frameworks: Node.js, Nest.js, Fastify.js, Express.js, Sails.js, Django, FastAPI

Databases: PostgreSQL, MySQL, MongoDB, Neo4j, Redis, Qdrant, pgvector

Frontend: React.js, Next.js, Tailwind CSS

AI & Automation: OpenAI API, n8n, AI integrations, OpenChat

Tools: Docker, AWS, Azure, Git, Bash, Swagger, Postman, Grafana

Professional Experience

Flexity - Full-Stack Developer - Jun 2023 - Present

- Delivered 6 product modules, 15+ REST endpoints, and 3 AI-assisted workflows while coordinating backend, frontend, QA, and release checks.

Projects

- Confidential Marketplace Platform (NDA):** B2C marketplace with seller/buyer flows, subscriptions, moderation, and payments.
 - Implemented subscription and payment-related flows.
 - Kept release-critical paths stable with 0 high-severity bugs during ownership.
 - Supported secure user flows with roles, validation, and payment integration.
 - Tech Stack:** TypeScript, Next.js, Nest.js, PostgreSQL, Stripe, AWS
- Flexboard:** Task and project management platform with AI sprint planning and real-time updates.
 - Delivered planning and real-time collaboration flows.
 - Improved team workflow visibility by 20%.
 - Connected AI-assisted sprint planning with project management screens.
 - Tech Stack:** JavaScript, React, Sails.js, PostgreSQL, AI, WebSockets
- LiveFrame (Vide):** AR platform for photo creators with real-time overlays and visual effects on content.
 - Stabilized backend request handling for media workflows.
 - Supported around 6000 daily requests with 97% service stability.
 - Optimized Django/PostgreSQL flows for content processing.
 - Tech Stack:** Python, Django, PostgreSQL, Redis
- FlexEstimation:** AI system that reads requirements and auto-generates time and cost estimates.
 - Implemented estimation flow from requirements input to calculated output.
 - Cut manual estimation effort by 70%.
 - Connected AI processing with Neo4j-backed project logic.
 - Tech Stack:** TypeScript, Nest.js, Neo4j, AI
- Kurs Shkola:** E-learning platform with AI course recommendations, interactive lessons, and progress tracking.
 - Delivered learning flows and progress-tracking logic.
 - Decreased manual course matching work by 35%.
 - Integrated AI recommendations into student-facing product flows.
 - Tech Stack:** TypeScript, Bun, PostgreSQL, AI
- Aironim:** AI chatbot for e-commerce and service websites with GPT answers and vector search for customer support.
 - Implemented support automation with n8n and OpenAI API.
 - Decreased manual support workload by 50%.
 - Connected JavaScript webhooks with vector-search-based answer retrieval.
 - Tech Stack:** n8n, OpenAI API, Qdrant, JavaScript, Webhooks

Robin - QA Engineer - Jun 2024 - Jan 2025 (Part-time)

- Structured Jira/Qase workflows and covered 95% of key functionality with test cases and autotests before release.

Projects

- Robin:** Banking app with transaction management, account analytics, and multi-factor authentication.
 - Found and documented 60+ bugs across payment, login, and transaction flows.
 - Tech Stack:** Firebase, Postman, Qase, Jira

NDA - Full-Stack Developer - Jan 2024 - Aug 2024 (Part-time)

- Stabilized legacy functionality by fixing 12+ critical bugs, adding 5 REST marketing integrations, and blocking 18% of weak purchased traffic.

Projects

- **Traffic Arbitrage System:** Traffic redistribution platform with real-time analytics and Redis queue management.
 - Developed a latency metric for purchased traffic.
 - Surfaced vendor quality gaps in real-time analytics.
 - Blocked 18% of weak traffic sources from redistribution.

Tech Stack: TypeScript, React, Fastify, PostgreSQL, Redis

- **SkyDelivery:** Delivery CMS with route optimization, driver tracking, and order lifecycle management.
 - Optimized route-processing logic for dispatcher workflows.
 - Decreased manual dispatcher checks by 25%.
 - Connected driver tracking with order lifecycle updates.

Tech Stack: TypeScript, Nest.js, Neo4j

- **Advertising Management Platform:** Ad campaign tool with performance analytics and creative asset tracking.
 - Implemented campaign management flows.
 - Increased reporting accuracy by 15%.
 - Connected creative asset tracking with performance analytics.

Tech Stack: JavaScript, React, Express, MongoDB

Freelance - Python Developer - Dec 2021 - Jun 2023

- Delivered 5+ client apps and bots since Dec 2021, automated 70% of manual data work, and configured Docker-based release handover.

Projects

- Beauty Salon Booking System, Telegram bot for a gym (Python, aiogram, PostgreSQL), Telegram bot for English learning and lesson booking (Python, aiogram, PostgreSQL), etc.

Education

- Master of Science in Radiotechnics - Kharkiv National University of Radio Electronics
- Bachelor of Science in Cybersecurity - Kharkiv National University of Radio Electronics

Languages

- English - B2
- Ukrainian - Native
- Russian - Native

Certifications

- EF Education First EF SET Certificate
- Cisco CCNA: Introduction to Networks
- Cisco CCNA: Switching, Routing & Wireless Essentials
- Cisco Networking Essentials

Hobbies

Mafia, Board games, Computer games, Martial arts, Theatrical art, Cooking, DnD, Chess
